LONDON

1st October 2005 - LIVE IT!

DAYENNE SKIN CARE

natural, safe and effective
skincare products

The team of researchers, who were highly experienced in the field of skin care, whilst researching the benefits of beer yeast realized that young cells of brewer's yeast had a beneficial effect and encouraged natural cell renewal and regeneration of the skin. The team developed and patented a process to stabilize young cells of brewer's yeast which could be safely used in the Dayenne skin care range. A healthy radiant complexion can be achieved with a good skin care regime, with a combination of superior skin care products and an excellent skin care ritual that will be most beneficial to the skin. Dayenne provides you with an unrivalled selection of innovative skin care products that are natural, safe and effective for looking after oily, problem, sensitive and acne-prone skin. Daily usage of Dayenne, which has been made from young brewer's yeast cells and pure extracts of Echinacea, Rudbekia, and St. John's Wort, will reveal clear, young, radiant and glowing skin.
