Pharmacist finds acne answer

Based on brewer's yeast cells, which are said to have a therapeutic effect on oily, problem, sensitive and acne-prone skin, the Dayenne skin care range has been available in Europe for many years. But having searched for a cure for his own oily acne-prone skin and found Dayenne to be the answer, a British pharmacist has now brought the range to the UK. Described as a 'safe, gentle and effective way of caring for oily and acne-prone skin', Dayenne comes in a range of products, including cleansing milk and cleansing bar, with rrp's from £9.99. Already hailed by the consumer press as a 'skin saviour', it can be ordered from the number below.
