SENSITIVE ISSUES

People with oily skin sometimes worry about over moisturising, but using the right products is most important. 'All skin needs to be moisturised, and usually twice a day is appropriate,' advises Marion.

The Dayenne skin care range is especially formulated for the care of oily, problem, sensitive and acne-prone skin. Dayenne is formulated to help regulate the amount of sebum produce by the skin, heal existing acne, prevent future break-outs, and encourage healthy cell regeneration. The range comprises soap, cleanser, tonic lotion, a mask, day and night creams and a cover stick.
