

Dayenne Cosmétique

LONDON

Winter 2006 - Salon Today

Germany's leading natural skin care brand for oily, problem and acne-prone skin is made from young cells of brewer's yeast which rebalances the skin's pH and regulates over-active sebaceous glands. Formulated by skin care specialists from The University of Munich and researchers at a French Hospital, Dayenne has for over 30 years stood the test of time by alleviating the symptoms of acne sufferers all over the world. Indeed, many customers carry on using Dayenne after their skin has cleared as it leaves the skin in a healthy state and gives it a youthful appearance. For more details Tel: 0208 866 6388
